

## GENERAL

Item  
210.GENERAL CONDITIONS

The following general conditions are in addition to Item 200, Terms of Service, and apply to all services, equipment, and facilities furnished by the Company as provided for in its various tariffs. C

1 On all Company lines that have calling on an Extended Area or Community Calling Service basis, and which would ordinarily, except for this arrangement, bear toll charges, the Company may limit the duration of use of the interoffice trunk lines to ensure fair and proportionate use of said interoffice trunk lines by persons entitled to such use. Should any customer exceed a limit so fixed by the Company, the Company may charge such customer the appropriate toll charges for such a call, if the trunk lines herein referred to were not included in an Extended Area or Community Calling Service arrangement. C

2 Except as provided for in Section 4.4 of Item 200, the Company may enter into agreements with customers whereby such customers may be required to install and/or maintain telephones, telephone equipment or lines provided by the Company when such telephones or lines are located or to be located in places involving unusual hazards whereby such customers assume all risks and liability incident to the installation, maintenance, and operation of such telephones, equipment, and lines. C

3 The Company shall not be liable to any customer having customer-provided equipment connected to the circuits or equipment of the Company for defects in material transmitted to or from such customer-provided equipment. C
