^(A) Total wireless gross activations, net activations and EOP subscribers include 100% of Virgin Mobile's subscribers.

^(B) The Q4 2008 Wireless subscriber base reflected the removal of 37k analog subscribers (11k postpaid, 26k prepaid) due to the decommissioning of the analog network. Additionally, the tightening of Virgin Mobile Canada credit and activation processes resulted in 32k Virgin postpaid subscribers being removed from the subscriber base. These adjustments are not included in the net activation or churn metrics.

^(C) Beginning in Q3 2009, wireless average revenue per unit, churn, usage per subscriber and cost of acquisition reflect 100% of Virgin's results due to our acquisition on July 1, 2009 of the remaining 50% not already owned. All prior periods reflect the original 50% ownership.

^(D) Following a company-wide review of subscriber metrics, we reduced subscribers by 35K for postpaid and 2K for prepaid as at the end of Q4 2009. The definition of usage per subscriber has been refined and all prior periods have been restated for comparability.

^(E) Wireless average revenue per unit, churn, usage per subscriber and cost of acquisition in the prior years have been restated to include 100% of Virgin Mobile results, rather than 50%.

- (1) Throughout this report, BCE means BCE Inc., its subsidiaries and joint ventures; Bell means our Bell Wireline and Bell Wireless segments on an aggregate basis; and Bell Aliant means Bell Aliant Regional Communications Income Fund and its affiliated entities.
- (2) We report our results of operations in three segments: Bell Wireline, Bell Wireless and Bell Aliant. Our reporting structure reflects how we manage our business and how we classify our operations for planning and measuring performance. Accordingly, we operate and manage our reportable segments as strategic business units organized by products and services.

During the third quarter of 2008, certain elements of our operating segments were realigned to reflect changes in our management accountabilities for operations. Our reportable segments did not change.

(3) **Non-GAAP Financial Measures**

EBITDA

The term EBITDA (earnings before interest, taxes, depreciation and amortization of intangible assets) does not have any standardized meaning according to Canadian generally accepted accounting principles (GAAP). It is therefore unlikely to be comparable to similar measures presented by other companies.

We define EBITDA as operating revenues less cost of revenue, selling, general and administrative expenses and net benefit plans costs, meaning it represents operating income before depreciation, amortization of intangible assets and restructuring and other.

We use EBITDA, among other measures, to assess the operating performance of our ongoing businesses without the effects of depreciation, amortization of intangible assets and restructuring and other. We exclude these items because they affect the comparability of our financial results and could potentially distort the analysis of trends in business performance. We exclude depreciation and amortization of intangible assets because it largely depends on the accounting methods and assumptions a company uses, as well as non-operating factors, such as the historical cost of capital assets. Excluding restructuring and other does not imply they are non-recurring.

EBITDA allows us to compare our operating performance on a consistent basis. We believe that certain investors and analysts use EBITDA to measure a company's ability to service debt and to meet other payment obligations, or as a common measurement to value companies in the telecommunications industry.

The most comparable Canadian GAAP financial measure is operating income.

Adjusted earnings per share (EPS)

The term adjusted EPS does not have any standardized meaning according to Canadian GAAP. It is therefore unlikely to be comparable to similar measures presented by other companies.

We define adjusted EPS as EPS before restructuring and other and net losses (gains) on investments.

Accompanying Notes

We use adjusted EPS among other measures, to assess the operating performance of our ongoing businesses without the effects of after-tax restructuring and other and net losses (gains) on investments. We exclude these items because they affect the comparability of our financial results and could potentially distort the analysis of trends in business performance. Excluding these items does not imply they are non-recurring.

The most comparable Canadian GAAP financial measure is EPS.

FREE CASH FLOW

The term free cash flow does not have any standardized meaning according to Canadian GAAP. It is therefore unlikely to be comparable to similar measures presented by other companies.

We define free cash flow as cash from operating activities and distributions received from Bell Aliant less capital expenditures, preferred share dividends, distributions paid by subsidiaries to non-controlling interest, other investing activities and Bell Aliant free cash flow.

We consider free cash flow to be an important indicator of the financial strength and performance of our business because it shows how much cash is available to repay debt and to reinvest in our company. We present free cash flow on a consistent basis from period to period, which allows us to compare our financial performance on a consistent basis.

We believe that certain investors and analysts use free cash flow when valuing a business and its underlying assets.

The most comparable Canadian GAAP financial measure is cash from operating activities.

- (4) EBITDA margin is calculated as follows:

$$\frac{\text{EBITDA}}{\text{Operating revenues}}$$

- (5) Capital Intensity is calculated as follows:

$$\frac{\text{Capital expenditures}}{\text{Operating revenues}}$$

- (6) Average revenue per unit (ARPU) represents the measurement of the average revenue generated by each unit, expressed as a rate per month for the year.
- (7) Churn is the rate at which existing subscribers cancel their services. Churn is calculated as the number of subscribers disconnected divided by the average subscriber base.
- (8) Cost of acquisition (COA) is also referred to as subscriber acquisition costs. This measure is expressed per gross activation. It includes costs associated with acquiring a customer such as hardware subsidies, marketing and distribution costs.

Accompanying Notes

(9) Cash flow per share is calculated as follows:

Cash flow from operating activities less capital expenditures
Average number of common shares outstanding

(10) Annualized cash flow yield is calculated as follows:

Trailing 12 month free cash flow
Number of common shares outstanding at end of period multiplied by share price at end of period

(11) Common dividend payout is calculated as follows:

Dividends per common share
Adjusted EPS
