## Accompanying Notes

Beginning January 1, 2015, we report our results of operations in three segments: Bell Wireless, Bell Wireline and Bell Media. Our reporting structure reflects how we manage our business and how we classify our operations for planning and measuring performance.

- (1) Throughout this report, *we, us, our, the company* and *BCE* mean, as the context may require, either BCE Inc. or, collectively, BCE Inc., its subsidiaries, joint arrangements and associates; and *Bell Aliant* means, as the context may require, until December 31, 2014, either Bell Aliant Inc. or, collectively, Bell Aliant Inc. and its subsidiaries and associates, or, after December 31, 2014 and up to, and including, June 30, 2015, either Bell Aliant Regional Communications Inc. or, collectively, Bell Aliant Regional Communications Inc. and its subsidiaries and associates.
- (2) On October 31, 2014, BCE completed the acquisition of all the issued and outstanding shares of Bell Aliant that it did not already own, therefore eliminating the 55.9% ownership interest held by non-controlling interest. Beginning January 1, 2015, the results of operation of our former Bell Aliant segment are included within our Bell Wireless and Bell Wireline segments, with prior periods restated for comparative purposes.

### (3) **Non-GAAP Financial Measures**

#### **Adjusted EBITDA and Adjusted EBITDA margin**

The terms Adjusted EBITDA and Adjusted EBITDA margin do not have any standardized meaning under International Financial Reporting Standards (IFRS). Therefore, they are unlikely to be comparable to similar measures presented by other issuers.

We define Adjusted EBITDA as operating revenues less operating costs (including post-employment benefit plans service cost). We define Adjusted EBITDA margin as Adjusted EBITDA divided by operating revenues.

We use Adjusted EBITDA and Adjusted EBITDA margin to evaluate the performance of our businesses as they reflect their ongoing profitability. We believe that certain investors and analysts use Adjusted EBITDA to measure a company's ability to service debt and to meet other payment obligations or as a common measurement to value companies in the telecommunications industry. We believe that certain investors and analysts also use Adjusted EBITDA and Adjusted EBITDA margin to evaluate the performance of our businesses. Adjusted EBITDA also is one component in the determination of short-term incentive compensation for all management employees.

Adjusted EBITDA and Adjusted EBITDA margin have no directly comparable IFRS financial measure. Alternatively, Adjusted EBITDA may be reconciled to net earnings as shown in this document.

#### **Adjusted net earnings and Adjusted earnings per share (EPS)**

The terms Adjusted net earnings and Adjusted EPS do not have any standardized meaning under IFRS. Therefore, they are unlikely to be comparable to similar measures presented by other issuers.

We define Adjusted net earnings as net earnings attributable to common shareholders before severance, acquisition and other costs, net (gains) losses on investments, and early debt redemption costs. We define Adjusted EPS as Adjusted net earnings per BCE common share.

## Accompanying Notes

We use Adjusted net earnings and Adjusted EPS and we believe that certain investors and analysts use these measures, among other ones, to assess the performance of our businesses without the effects of severance, acquisition and other costs, net (gains) losses on investments, and early debt redemption costs, net of tax and non-controlling interest. We exclude these items because they affect the comparability of our financial results and could potentially distort the analysis of trends in business performance. Excluding these items does not imply they are non-recurring.

The most comparable IFRS financial measures are net earnings attributable to common shareholders and EPS.

### Free Cash Flow and Free Cash Flow per share

The terms Free Cash Flow and Free Cash Flow per share do not have any standardized meaning under IFRS. Therefore, they are unlikely to be comparable to similar measures presented by other issuers.

As of November 1, 2014, BCE's Free Cash Flow includes 100% of Bell Aliant's Free Cash Flow rather than cash dividends received from Bell Aliant. We define Free Cash Flow as cash flows from operating activities, excluding acquisition costs paid and voluntary pension funding, less capital expenditures, preferred share dividends and dividends paid by subsidiaries to non-controlling interest.

Prior to November 1, 2014, Free Cash Flow was defined as cash flows from operating activities, excluding acquisition costs paid and voluntary pension funding, plus dividends received from Bell Aliant, less capital expenditures, preferred share dividends, dividends paid by subsidiaries to non-controlling interest and Bell Aliant Free Cash Flow.

We define Free Cash Flow per share as follows:

#### Free Cash Flow

Average number of common shares outstanding

We consider Free Cash Flow and Free Cash Flow per share to be important indicators of the financial strength and performance of our businesses because they show how much cash is available to pay dividends, repay debt and reinvest in our company.

We believe that certain investors and analysts use Free Cash Flow to value a business and its underlying assets. We believe that certain investors and analysts also use Free Cash Flow and Free Cash Flow per share to evaluate the financial strength and performance of our businesses.

For Free Cash Flow, the most comparable IFRS financial measure is cash flows from operating activities.

### Net debt

The term Net Debt does not have any standardized meaning under IFRS. Therefore, it is unlikely to be comparable to similar measures presented by other issuers.

We define Net Debt as debt due within one year plus long-term debt and 50% of preferred shares less cash and cash equivalents. We include 50% of outstanding preferred shares in our Net Debt as it is consistent with the treatment by certain credit rating agencies.

## Accompanying Notes

We consider Net Debt to be an important indicator of the company's financial leverage because it represents the amount of debt that is not covered by available cash and cash equivalents. We believe that certain investors and analysts use Net Debt to determine a company's financial leverage.

Net Debt has no directly comparable IFRS financial measure, but rather is calculated using several asset and liability categories from the statements of financial position, as shown in this document.

### (4) Key Performance Indicators (KPIs)

We use a number of KPIs to measure the success of our strategic imperatives. These KPIs are not accounting measures and may not be comparable to similar measures presented by other issuers.

**Capital Intensity** is capital expenditures divided by operating revenues.

**Average revenue per user or subscriber (ARPU)** represents the measurement of certain service revenues divided by the average subscriber base for the specified period.

**Churn** is the rate at which existing subscribers cancel their services, expressed as a percentage. Churn is calculated as the number of subscribers disconnected divided by the average subscriber base. It is a measure of monthly customer turnover.

**Cost of acquisition (COA)** is also referred to as subscriber acquisition costs. COA represents the total cost associated with acquiring a customer and includes costs such as hardware discounts, marketing and distribution costs. This measure is expressed per gross activation during the period.

#### **Net Debt to Adjusted EBITDA**

Net Debt to Adjusted EBITDA is BCE Net Debt divided by Adjusted EBITDA. Net Debt is debt due within one year plus long-term debt and 50% of preferred shares less cash and cash equivalents. For the purposes of calculating our Net Debt to Adjusted EBITDA ratio, Adjusted EBITDA is defined as twelve-month trailing BCE Adjusted EBITDA.

#### **Adjusted EBITDA to net interest expense**

Adjusted EBITDA to net interest expense is Adjusted EBITDA divided by net interest expense. For the purposes of calculating our Adjusted EBITDA to net interest expense ratio, Adjusted EBITDA is defined as twelve-month trailing BCE Adjusted EBITDA. Net interest expense is twelve-month trailing BCE interest expense excluding interest on post-employment benefit obligations and including 50% of preferred dividends.

(5) Annualized cash flow yield is calculated as follows:

#### Trailing 12 month Free Cash Flow

Number of common shares outstanding at end of period multiplied by share price at end of period
