n.m.: not meaningful

[A] Adjusted EBITDA is a total of segments measure, adjusted net earnings is a non-GAAP financial measure and adjusted EPS is a non-GAAP ratio. Refer to note 2.3, *Total of segments measures,* note 2.1, *Non-GAAP financial measures* and note 2.2, *Non-GAAP ratios* in the Accompanying Notes to this report for more information on these measures.

[B] Adjusted EBITDA margin is defined as adjusted EBITDA divided by operating revenues.

n.m. : not meaningful

(A) BBM operating revenue includes wireline and wireless service and product revenue from large and medium retail business customers generated from the sale of communications services and artificial intelligence (AI)-powered solutions. Communications revenue is comprised of: core connectivity services, including wireless, Internet, voice, and data network services sold directly to enterprise customers, as well as advanced cloud-based services such as Contact Center as a Service (CCaaS) and unified-communications-as-a-service (UCaaS). AI-powered solutions revenue is comprised of revenue from Ateko, Bell Cyber, and Bell AI Fabric.

n.m. : not meaningful

[A] In Q3 2026, our high-speed Internet subscriber base and our residential FTTH Internet subscriber base increased by 3,839 and 3,814 subscribers, respectively, as a result of a small acquisition made by Ziply Fiber in the quarter.

[B] Effective January 1, 2026, we updated our Internet subscriber metrics to include wholesale subscribers as a result of the impacts on our operations of a recent Canadian Radio-television and Telecommunications Commission (CRTC) decision mandating the establishment of an aggregated wholesale high-speed access service on fibre-to-the premise (FTTP) facilities. Accordingly, previously reported 2025 subscribers and net activations have been restated for comparability. Additionally, we expanded our disclosure to separately report residential FTTH subscribers and net activations.

[C] Effective January 1, 2026, Bell CTS Canada updated the definition of an Internet protocol television (IPTV) subscriber to include bundled streaming service subscribers, which are reflected under a new video subscriber metric. To be classified as a bundled streaming service subscriber, a customer must subscribe to a package that includes at least one third-party streaming service and one streaming service offered by BCE (comprised of duos, trios and quad packages including Crave, TSN, Netflix and Disney+) where BCE has a direct customer relationship. Accordingly, previously reported 2025 subscribers and net activations have been restated for comparability.

[D] Effective January 1, 2026, Bell CTS Canada removed 134,000 mobile phone subscribers (31,000 postpaid and 103,000 prepaid) and 92,884 mobile connected device subscribers from the respective subscriber bases as a result of our decision to decommission our third-generation high-speed packet access (3G/HSPA) network in Manitoba as of December 31, 2025 and nationally as of March 31, 2027.

[E] At the beginning of Q1 2026, Bell CTS Canada removed 181,086 Virgin Plus Internet subscribers (including 124,956 FTTH subscribers) from the respective subscriber bases as we stopped selling new plans for this service in Ontario as of January 14, 2026.

[F] At the beginning of Q1 2026, Bell CTS Canada removed 21,886 Virgin Plus IPTV subscribers from the subscriber base as we stopped selling new plans for this service in Ontario as of January 14, 2026.

[G] In Q4 2025, after a comprehensive review of Ziply Fiber subscriber accounts following our acquisition on August 1, 2025, we reduced our high-speed Internet and retail residential NAS subscriber bases, by 13,029 (including 10,955 FTTH subscribers) and 1,106 customers, respectively, to align with Bell methodology for customer deactivations.

[H] In Q3 2025, Bell CTS Canada reduced its postpaid mobile phone and connected device subscriber bases by 51,541 and 7,867, respectively, following a review of a public sector customer account to eliminate subscribers with no usage.

[I] In Q3 2025, as a result of the acquisition of Ziply Fiber on August 1, 2025, Bell CTS U.S. high-speed Internet (including wholesale), video and retail residential NAS lines subscriber bases increased by 442,861 (including 358,615 FTTH subscribers), 6,089 and 84,440 subscribers, respectively.

[J] Mobile phone blended ARPU is defined as Bell CTS Canada wireless external services revenues divided by the average mobile phone subscriber base for the specified period, expressed as a dollar unit per month.

[A] In Q3 2026, our high-speed Internet subscriber base and our residential FTTH Internet subscriber base increased by 3,839 and 3,814 subscribers, respectively, as a result of a small acquisition made by Ziply Fiber in the quarter.

[B] Effective January 1, 2026, we updated our Internet subscriber metrics to include wholesale subscribers as a result of the impacts on our operations of a recent CRTC decision mandating the establishment of an aggregated wholesale high-speed access service on FTTP facilities. Accordingly, previously reported 2025 subscribers and net activations have been restated for comparability. Additionally, we expanded our disclosure to separately report residential FTTH subscribers and net activations.

[C] Effective January 1, 2026, Bell CTS Canada updated the definition of an IPTV subscriber to include bundled streaming service subscribers, which are reflected under a new video subscriber metric. To be classified as a bundled streaming service subscriber, a customer must subscribe to a package that includes at least one third-party streaming service and one streaming service offered by BCE (comprised of duos, trios and quad packages including Crave, TSN, Netflix and Disney+) where BCE has a direct customer relationship. Accordingly, previously reported 2025 subscribers and net activations have been restated for comparability.

[D] Effective January 1, 2026, Bell CTS Canada removed 134,000 mobile phone subscribers (31,000 postpaid and 103,000 prepaid) and 92,884 mobile connected device subscribers from the respective subscriber bases as a result of our decision to decommission our 3G/HSPA network in Manitoba as of December 31, 2025 and nationally as of March 31, 2027.

[E] At the beginning of Q1 2026, Bell CTS Canada removed 181,086 Virgin Plus Internet subscribers (including 124,956 FTTH subscribers) from the respective subscriber bases as we stopped selling new plans for this service in Ontario as of January 14, 2026.

[F] At the beginning of Q1 2026, Bell CTS Canada removed 21,886 Virgin Plus IPTV subscribers from the subscriber base as we stopped selling new plans for this service in Ontario as of January 14, 2026.

[G] In Q4 2025, after a comprehensive review of Ziply Fiber subscriber accounts following our acquisition on August 1, 2025, we reduced our high-speed Internet and retail residential NAS subscriber bases, by 13,029 (including 10,955 FTTH subscribers) and 1,106 customers, respectively, to align with Bell methodology for customer deactivations.

[H] In Q3 2025, Bell CTS Canada reduced its postpaid mobile phone and connected device subscriber bases by 51,541 and 7,867, respectively, following a review of a public sector customer account to eliminate subscribers with no usage.

[I] In Q3 2025, as a result of the acquisition of Ziply Fiber on August 1, 2025, Bell CTS U.S. high-speed Internet (including wholesale), video and retail residential NAS lines subscriber bases increased by 442,861 (including 358,615 FTTH subscribers), 6,089 and 84,440 subscribers, respectively.

[(A)] Net debt, free cash flow and free cash flow after payment of lease liabilities are non-GAAP financial measures and net debt leverage ratio is a capital management measure. Refer to note 2.1, *Non-GAAP financial measures* and note 2.4, *Capital management measures* in the Accompanying Notes to this report for more information on these measures.

[(B)] In Q1 2026, we updated our definitions of free cash flow and free cash flow after payment of lease liabilities to exclude income taxes paid on significant divestitures included within cash flows from operating activities. This change does not impact the amounts for free cash flow and free cash flow after payment of lease liabilities previously presented. We exclude this item as it could affect the comparability of our financial results and potentially distort the analysis of trends in business performance. Excluding this item does not imply it is non-recurring.

(1) Our results are reported in three segments: Bell CTS Canada, Bell CTS U.S. and Bell Media.

Throughout this report, *we, us, our, BCE* and *the company* mean, as the context may require, either BCE Inc. or, collectively, BCE Inc., Bell Canada, their subsidiaries, joint arrangements and associates. *Bell* means, as the context may require, either Bell Canada or, collectively, Bell Canada, its subsidiaries, joint arrangements and associates.

(2) **Non-GAAP and other financial measures**

BCE uses various financial measures to assess its business performance. Certain of these measures are calculated in accordance with IFRS® Accounting Standards or GAAP while certain other measures do not have a standardized meaning under GAAP. We believe that our GAAP financial measures, read together with adjusted non-GAAP and other financial measures, provide readers with a better understanding of how management assesses BCE's performance.

National Instrument 52-112, *Non-GAAP and Other Financial Measures Disclosure* (NI 52-112), prescribes disclosure requirements that apply to the following specified financial measures:

- Non-GAAP financial measures
- Non-GAAP ratios
- Total of segments measures
- Capital management measures
- Supplementary financial measures

This section provides a description and classification of the specified financial measures contemplated by NI 52-112 that we use in this report to explain our financial results except that, for supplementary financial measures, an explanation of such measures is provided where they are first referred to in this report if the supplementary financial measures' labelling is not sufficiently descriptive.

(2.1) **Non-GAAP financial measures**

A non-GAAP financial measure is a financial measure used to depict our historical or expected future financial performance, financial position or cash flow and, with respect to its composition, either excludes an amount that is included in, or includes an amount that is excluded from, the composition of the most directly comparable financial measure disclosed in BCE's consolidated primary financial statements. We believe that non-GAAP financial measures are reflective of our on-going operating results and provide readers with an understanding of management's perspective on and analysis of our performance.

Below are descriptions of the non-GAAP financial measures that we use in this report to explain our results. Reconciliations to the most directly comparable financial measures under IFRS Accounting Standards on a consolidated basis are set out earlier in this report.

Adjusted net earnings

The term adjusted net earnings does not have any standardized meaning under IFRS Accounting Standards. Therefore, it is unlikely to be comparable to similar measures presented by other issuers.

We define adjusted net earnings as net earnings (loss) attributable to common shareholders before severance, acquisition and other costs, net mark-to-market losses (gains) on derivatives used to economically hedge equity settled share-based compensation plans, net equity losses (gains) on investments in associates and joint ventures, net losses (gains) on investments, net early debt redemption costs (gains), impairment of assets and discontinued operations, net of tax and NCI.

We use adjusted net earnings and we believe that certain investors and analysts use this measure, among other ones, to assess the performance of our businesses without the effects of severance, acquisition and other costs, net mark-to-market losses (gains) on derivatives used to economically hedge equity settled share-based compensation plans, net equity losses (gains) on investments in associates and joint ventures, net losses (gains) on investments, net early debt redemption costs (gains), impairment of assets and discontinued operations, net of tax and NCI. We exclude these items because they affect the comparability of our financial results and could potentially distort the analysis of trends in business performance. Excluding these items does not imply they are non-recurring.

The most directly comparable financial measure under IFRS Accounting Standards is net earnings (loss) attributable to common shareholders. Refer to pages 2 and 3 of this report for a reconciliation of net earnings (loss) attributable to common shareholders to adjusted net earnings on a consolidated basis.

Free cash flow and free cash flow after payment of lease liabilities

The terms free cash flow and free cash flow after payment of lease liabilities do not have any standardized meaning under IFRS Accounting Standards. Therefore, they are unlikely to be comparable to similar measures presented by other issuers.

We define free cash flow as cash flows from operating activities, excluding cash from discontinued operations, income taxes paid on significant divestitures, acquisition and other costs paid (which include significant litigation costs) and voluntary pension funding, less capital expenditures, preferred share dividends and dividends paid by subsidiaries to NCI. We exclude cash from discontinued operations, income taxes paid on significant divestitures, acquisition and other costs paid and voluntary pension funding because they affect the comparability of our financial results and could potentially distort the analysis of trends in business performance. Excluding these items does not imply they are non-recurring.

We define free cash flow after payment of lease liabilities as cash flows from operating activities, excluding cash from discontinued operations, income taxes paid on significant divestitures, acquisition and other costs paid (which include significant litigation costs) and voluntary pension funding, less principal payment of lease liabilities, capital expenditures, preferred share dividends and dividends paid by subsidiaries to NCI. We exclude cash from discontinued operations, income taxes paid on significant divestitures, acquisition and other costs paid and voluntary pension funding because they affect the comparability of our financial results and could potentially distort the analysis of trends in business performance. Excluding these items does not imply they are non-recurring.

We consider free cash flow and free cash flow after payment of lease liabilities to be important indicators of the financial strength and performance of our businesses. Free cash flow and free cash flow after payment of lease liabilities show how much cash is available to pay dividends on common shares, repay debt and reinvest in our company. We believe that certain investors and analysts use free cash flow and free cash flow after payment of lease liabilities to value a business and its underlying assets and to evaluate the financial strength and performance of our businesses. The most directly comparable financial measure under IFRS Accounting Standards is cash flows from operating activities. Refer to pages 12, 13 and 14 of this report for a reconciliation of cash flows from operating activities to free cash flow and free cash flow after payment of lease liabilities on a consolidated basis.

Net debt

The term net debt does not have any standardized meaning under IFRS Accounting Standards. Therefore, it is unlikely to be comparable to similar measures presented by other issuers.

We define net debt as debt due within one year plus long-term debt and 50% of outstanding preferred shares, less 50% of junior subordinated debt included within long-term debt, and less cash, cash equivalents and short-term investments, as shown in BCE's consolidated statements of financial position.

We, and certain investors and analysts, consider net debt to be an important indicator of the company's financial leverage.

Net debt is calculated using several asset and liability categories from the statements of financial position. The most directly comparable financial measure under IFRS Accounting Standards is long-term debt. Refer to page 12 of this report for a reconciliation of long-term debt to net debt on a consolidated basis.

(2.2) Non-GAAP ratios

A non-GAAP ratio is a financial measure disclosed in the form of a ratio, fraction, percentage or similar representation and that has a non-GAAP financial measure as one or more of its components.

Adjusted EPS

The term adjusted EPS does not have any standardized meaning under IFRS Accounting Standards. Therefore, it is unlikely to be comparable to similar measures presented by other issuers.

We define adjusted EPS as adjusted net earnings per BCE common share. Adjusted net earnings is a non-GAAP financial measure. For further details on adjusted net earnings, see note 2.1 – *Non-GAAP financial measures* above.

We use adjusted EPS, and we believe that certain investors and analysts use this measure, among other ones, to assess the performance of our businesses without the effects of severance, acquisition and other costs, net mark-to-market losses (gains) on derivatives used to economically hedge equity settled share-based compensation plans, net equity losses (gains) on investments in associates and joint ventures, net losses (gains) on investments, net early debt redemption costs (gains), impairment of assets and discontinued operations, net of tax and NCI. We exclude these items because they affect the comparability of our financial results and could potentially distort the analysis of trends in business performance. Excluding these items does not imply they are non-recurring.

(2.3) Total of segments measures

A total of segments measure is a financial measure that is a subtotal or total of 2 or more reportable segments and is disclosed within the Notes to BCE's consolidated primary financial statements.

Adjusted EBITDA and Bell CTS adjusted EBITDA

We define adjusted EBITDA as operating revenues less operating costs.

We define Bell CTS adjusted EBITDA as BCE adjusted EBITDA less Bell Media adjusted EBITDA.

The most directly comparable financial measure under IFRS Accounting Standards is net earnings. The following table provides reconciliations of net earnings to BCE adjusted EBITDA and Bell CTS adjusted EBITDA.

	YTD 2026	**Q3 2026**	Q2 2026	Q1 2026	Total 2025	Q4 2025	YTD 2025	Q3 2025	Q2 2025	Q1 2025

Impairment of assets	**13**	**2**	6	5	1,027	40	987	970	8	9
Net losses (gains) on investments	**1**	**(2)**	2	1	(5,217)	(52)	(5,165)	(5,175)	8	2
Other (income) expense	**(85)**	**11**	(58)	(38)	(287)	(102)	(185)	95	30	(310)
Income taxes	**757**	**254**	264	239	1,193	201	992	495	240	257
BCE adjusted EBITDA	**8,119**	**2,786**	2,702	2,631	10,658	2,664	7,994	2,762	2,674	2,558
Less: Bell Media adjusted EBITDA	**(655)**	**(256)**	(244)	(155)	(782)	(151)	(631)	(237)	(235)	(159)
Bell CTS adjusted EBITDA	**7,464**	**2,530**	2,458	2,476	9,876	2,513	7,363	2,525	2,439	2,399

(2.4) Capital management measures

A capital management measure is a financial measure that is intended to enable a reader to evaluate our objectives, policies and processes for managing our capital and is disclosed within the Notes to BCE's consolidated financial statements.

The financial reporting framework used to prepare the financial statements requires disclosure that helps readers assess the company's capital management objectives, policies, and processes, as set out in IFRS Accounting Standards in IAS 1 – *Presentation of Financial Statements.* BCE has its own methods for managing capital and liquidity, and IFRS Accounting Standards do not prescribe any particular calculation method.

Net debt leverage ratio

The net debt leverage ratio represents net debt divided by adjusted EBITDA. Net debt used in the calculation of the net debt leverage ratio is a non-GAAP financial measure. For further details on net debt, see note 2.1, *Non-GAAP financial measures* above. For the purposes of calculating our net debt leverage ratio, adjusted EBITDA is twelve-month trailing adjusted EBITDA.

We use, and believe that certain investors and analysts use, the net debt leverage ratio as a measure of financial leverage.

(2.5) **Supplementary financial measures**

A supplementary financial measure is a financial measure that is not reported in BCE's consolidated financial statements, and is, or is intended to be, reported periodically to represent historical or expected future financial performance, financial position, or cash flows.

An explanation of such measures is provided where they are first referred to in this report if the supplementary financial measures' labelling is not sufficiently descriptive.

(3) **Key performance indicators (KPIs)**

In addition to the non-GAAP financial measures and other financial measures described previously, we use the following KPIs to measure the success of our strategic priorities. These KPIs are not accounting measures and may not be comparable to similar measures presented by other issuers.

Adjusted EBITDA margin is defined as adjusted EBITDA divided by operating revenues.

Capital intensity is defined as capital expenditures divided by operating revenues.

Mobile phone blended ARPU is defined as Bell CTS Canada wireless external services revenues divided by the average mobile phone subscriber base for the specified period, expressed as a dollar unit per month.

Mobile phone blended churn is the rate at which existing mobile phone subscribers cancel their services. It is a measure of our ability to retain our customers. Mobile phone churn is calculated by dividing the number of mobile phone deactivations during a given period by the average number of mobile phone subscribers in the base for the specified period and is expressed as a percentage per month.

Mobile phone subscriber unit is comprised of a recurring revenue generating portable unit (e.g. smartphones and feature phones) on an active service plan, that has access to our wireless networks and includes voice, text and/or data connectivity. We report mobile phone subscriber units in two categories: postpaid and prepaid. Prepaid mobile phone subscriber units are considered active for a period of 90 days following the expiry of the subscriber's prepaid balance.

Mobile connected device subscriber unit is comprised of a recurring revenue generating portable unit (e.g. tablets, wearables, mobile Internet devices and Internet of Things) on an active service plan, that has access to our wireless networks and is intended for limited or no cellular voice capability.

Wireline subscriber unit consists of an active revenue-generating unit with access to standalone services, including Internet, retail video, and/or retail residential NAS. A wireline subscriber is included in our subscriber base once a billing relationship has been established following the installation and operation of the service at the customer premise and the customer's purchase of a subscription.

- Internet subscribers include both retail and wholesale subscribers and are primarily represented by a dwelling unit or a business location. Customers are classified as FTTH subscribers when the fibre optic cable is terminated at the customer's home or apartment, and the Internet service is delivered over the fibre network.
- Retail video subscribers consist of IPTV subscribers which are primarily represented by a dwelling unit or a business location and also include bundled streaming service subscribers. To be classified as a bundled streaming service subscriber, a customer must subscribe to a package that includes at least one third-party streaming service and one streaming service offered by BCE (comprised of duos, trios and quad packages including Crave, TSN, Netflix and Disney+) where BCE has a direct customer relationship.
- Retail residential NAS subscribers are based on a line count and are represented by a unique telephone number
