Accompanying Notes

- (1) Our results are reported in three segments: Bell Wireless, Bell Wireline and Bell Media. Our segments reflect how we manage our business and how we classify our operations for planning and measuring performance.

Throughout this report, *we, us, our, BCE and the company* mean, as the context may require, either BCE Inc. or, collectively, BCE Inc., Bell Canada, their subsidiaries, joint arrangements and associates. *Bell* means, as the context may require, either Bell Canada or, collectively, Bell Canada, its subsidiaries, joint arrangements and associates.

- (2) On June 1, 2020, BCE announced that it had entered into an agreement to sell substantially all of its data centre operations in an all-cash transaction valued at \$1.04 billion. The transaction is expected to close in the second half of 2020, subject to customary closing conditions. As a result, we have reclassified amounts related to the announced sale for the previous periods to discontinued operations in our consolidated income statements and consolidated statements of cash flows to make them consistent with the presentation for the current period. We have also reclassified the assets and liabilities of the data centre operations to be sold as held for sale in our consolidated statements of financial position at June 30, 2020, measured at their carrying amount, which is lower than the estimated fair value less costs to sell. Property, plant and equipment and intangible assets included in assets held for sale are no longer depreciated or amortized effective June 1, 2020.
- (3) To align with changes in how we manage our business and assess performance, the operating results of our public safety land radio network business are now included within our Bell Wireline segment effective January 1, 2020, with prior periods restated for comparative purposes. Previously, these results were included within our Bell Wireless segment. Our public safety land radio network business, which builds and manages land mobile radio networks primarily for the government sector, is now managed by our Bell Business Markets team in order to better serve our customers with end-to-end communications solutions.

(4) **Non-GAAP Financial Measures**

In Q2 2020, we updated our definitions of adjusted net earnings, adjusted EPS and free cash flow to exclude the impacts of discontinued operations as they may affect the comparability of our financial results and could potentially distort the analysis of trends in business performance. As a result of this change, prior periods have been restated for comparative purposes.

Adjusted EBITDA and adjusted EBITDA margin

The terms adjusted EBITDA and adjusted EBITDA margin do not have any standardized meaning under IFRS. Therefore, they are unlikely to be comparable to similar measures presented by other issuers.

We define adjusted EBITDA as operating revenues less operating costs (including post-employment benefit plans service cost) as shown in BCE's consolidated income statements. Adjusted EBITDA for BCE's segments is the same as segment profit as reported in BCE's consolidated financial statements. We define adjusted EBITDA margin as adjusted EBITDA divided by operating revenues.

We use adjusted EBITDA and adjusted EBITDA margin to evaluate the performance of our businesses as they reflect their ongoing profitability. We believe that certain investors and analysts use adjusted EBITDA to measure a company's ability to service debt and to meet other payment obligations or as a common measurement to value companies in the telecommunications industry. We believe that certain investors and analysts also use adjusted EBITDA and adjusted EBITDA margin to evaluate the performance of our businesses. Adjusted EBITDA also is one component in the determination of short-term incentive compensation for all management employees.

Adjusted EBITDA and adjusted EBITDA margin have no directly comparable IFRS financial measure. Alternatively, adjusted EBITDA may be reconciled to net earnings as shown in this document.

Adjusted net earnings and adjusted EPS

The terms adjusted net earnings and adjusted EPS do not have any standardized meaning under IFRS. Therefore, they are unlikely to be comparable to similar measures presented by other issuers.

We define adjusted net earnings as net earnings attributable to common shareholders before severance, acquisition and other costs, net mark-to-market losses (gains) on derivatives used to economically hedge equity settled share-based compensation plans, net losses (gains) on investments, early debt redemption costs, impairment of assets and discontinued operations, net of tax and non-controlling interest (NCI). We define adjusted EPS as adjusted net earnings per BCE common share.

We use adjusted net earnings and adjusted EPS, and we believe that certain investors and analysts use these measures, among other ones, to assess the performance of our businesses without the effects of severance, acquisition and other costs, net mark-to-market losses (gains) on derivatives used to economically hedge equity settled share-based compensation plans, net losses (gains) on investments, early debt redemption costs, impairment of assets and discontinued operations, net of tax and NCI. We exclude these items because they affect the comparability of our financial results and could potentially distort the analysis of trends in business performance. Excluding these items does not imply they are non-recurring.

The most comparable IFRS financial measures are net earnings attributable to common shareholders and EPS, as reconciled in this document.

Free cash flow

The term free cash flow does not have any standardized meaning under IFRS. Therefore, it is unlikely to be comparable to similar measures presented by other issuers.

We define free cash flow as cash flows from operating activities, excluding cash from discontinued operations, acquisition and other costs paid (which include significant litigation costs) and voluntary pension funding, less capital expenditures, preferred share dividends and dividends paid by subsidiaries to NCI. We exclude cash from discontinued operations, acquisition and other costs paid and voluntary pension funding because they affect the comparability of our financial results and could potentially distort the analysis of trends in business performance. Excluding these items does not imply they are non-recurring.

We consider free cash flow to be an important indicator of the financial strength and performance of our businesses because it shows how much cash is available to pay dividends on common shares, repay debt and reinvest in our company.

We believe that certain investors and analysts use free cash flow to value a business and its underlying assets and to evaluate the financial strength and performance of our businesses.

The most comparable IFRS financial measure is cash flows from operating activities, as reconciled in this document.

Net debt

The term net debt does not have any standardized meaning under IFRS. Therefore, it is unlikely to be comparable to similar measures presented by other issuers.

We define net debt as debt due within one year plus long-term debt and 50% of preferred shares, less cash and cash equivalents, as shown in BCE's consolidated statements of financial position. We include 50% of outstanding preferred shares in our net debt as it is consistent with the treatment by certain credit rating agencies.

We consider net debt to be an important indicator of the company's financial leverage because it represents the amount of debt that is not covered by available cash and cash equivalents. We believe that certain investors and analysts use net debt to determine a company's financial leverage.

Net debt has no directly comparable IFRS financial measure, but rather is calculated using several asset and liability categories from the statements of financial position, as shown in this document.

Net debt leverage ratio

The net debt leverage ratio does not have any standardized meaning under IFRS. Therefore, it is unlikely to be comparable to similar measures presented by other issuers. We use, and believe that certain investors and analysts use, the net debt leverage ratio as a measure of financial leverage.

The net debt leverage ratio represents net debt divided by adjusted EBITDA. For the purposes of calculating our net debt leverage ratio, adjusted EBITDA is twelve-month trailing adjusted EBITDA.

Adjusted EBITDA to net interest expense ratio

The ratio of adjusted EBITDA to net interest expense does not have any standardized meaning under IFRS. Therefore, it is unlikely to be comparable to similar measures presented by other issuers. We use, and believe that certain investors and analysts use, the adjusted EBITDA to net interest expense ratio as a measure of financial health of the company.

The adjusted EBITDA to net interest expense ratio represents adjusted EBITDA divided by net interest expense. For the purposes of calculating our adjusted EBITDA to net interest expense ratio, adjusted EBITDA is twelve-month trailing adjusted EBITDA. Net interest expense is twelve-month trailing net interest expense as shown in our statements of cash flows, plus 50% of declared preferred share dividends as shown in our income statements.

(5) Key performance indicators (KPIs)

In addition to the non-GAAP financial measures described previously, we use a number of KPIs to measure the success of our strategic imperatives. These KPIs are not accounting measures and may not be comparable to similar measures presented by other issuers.

Average billing per user (ABPU) or subscriber approximates the average amount billed to customers on a monthly basis, including monthly billings related to device financing receivables owing from customers on contract, which is used to track our recurring billing streams. Wireless blended ABPU is calculated by dividing certain customer billings by the average subscriber base for the specified period and is expressed as a dollar unit per month.

Capital intensity is capital expenditures divided by operating revenues.

Churn is the rate at which existing subscribers cancel their services. It is a measure of our ability to retain our customers. Wireless churn is calculated by dividing the number of deactivations during a given period by the average number of subscribers in the base for the specified period and is expressed as a percentage per month.

Wireless subscriber unit is comprised of an active revenue-generating unit (e.g. mobile device, tablet or wireless Internet products), with a unique identifier (typically International Mobile Equipment Identity (IMEI) number), that has access to our wireless networks. We report wireless subscriber units in two categories: postpaid and prepaid. Prepaid subscriber units are considered active for a period of 90 days following the expiry of the subscriber's prepaid balance.

Wireline subscriber unit consists of an active revenue-generating unit with access to our services, including retail Internet, satellite TV, IPTV, and/or NAS. A subscriber is included in our subscriber base when the service has been installed and is operational at the customer premise and a billing relationship has been established.

- Retail Internet, IPTV and satellite TV subscribers have access to stand-alone services, and are primarily represented by a dwelling unit
- Retail NAS subscribers are based on a line count and are represented by a unique telephone number
